

# PsycINFO

## Search Guide

## Searching PSYCINFO (via Ovid)

PsychINFO is an international bibliographic database of psychology, which indexes journals from 1806 to the present. All areas of psychology are covered, as well as the psychological aspects of related disciplines such as medicine, nursing, pharmacology, education, sociology and physiology.

### Searching the database

#### 1. Developing a Search Strategy

Before you begin searching you will need to develop a search strategy. This involves analysing the search topic and identifying the main concepts. Each concept may then have a number of different search terms which can describe that concept.

**Example Search Topic:** Effect of marijuana on schizophrenia.

Looking at the example search topic, the main concepts are: “Marijuana” and “Schizophrenia”. You can sometimes have several search terms for a concept, ie: synonyms or alternative descriptions. In this example, the concept of “Marijuana” has 3 possible search terms: Marijuana, Marijuana usage and Cannabis, as outlined in the table below.

**Example of Concepts & Search Terms:**

	<b>Concept 1</b>	<b>Concept 2</b>
	<b>SCHIZOPHRENIA</b>	<b>MARIJUANA</b>
<b>Search Term</b>	Schizophrenia	Marijuana
<b>Search Term</b>		Marijuana Usage
<b>Search Term</b>		Cannabis

#### 2. Database Search Options

There are two main ways of searching databases: **subject heading search** or **keyword search**.

- ❖ **Subject heading searching** allows you to find articles on a particular subject without having to search for every possible phrase or word that an author may have used to describe that subject. It will usually get you fewer but **more relevant results**, than the keyword option.
- ❖ **Keyword searching** is looking for a word or phrase appearing within a citation. You will usually retrieve lots of results, but they may include a lot of **irrelevant hits**. You also need to think of different terms and spelling that the author may have used to describe that topic, example: smoke, smokes, smokers, smoking, smoked, tobacco. (Keyword searching is described on page 12).

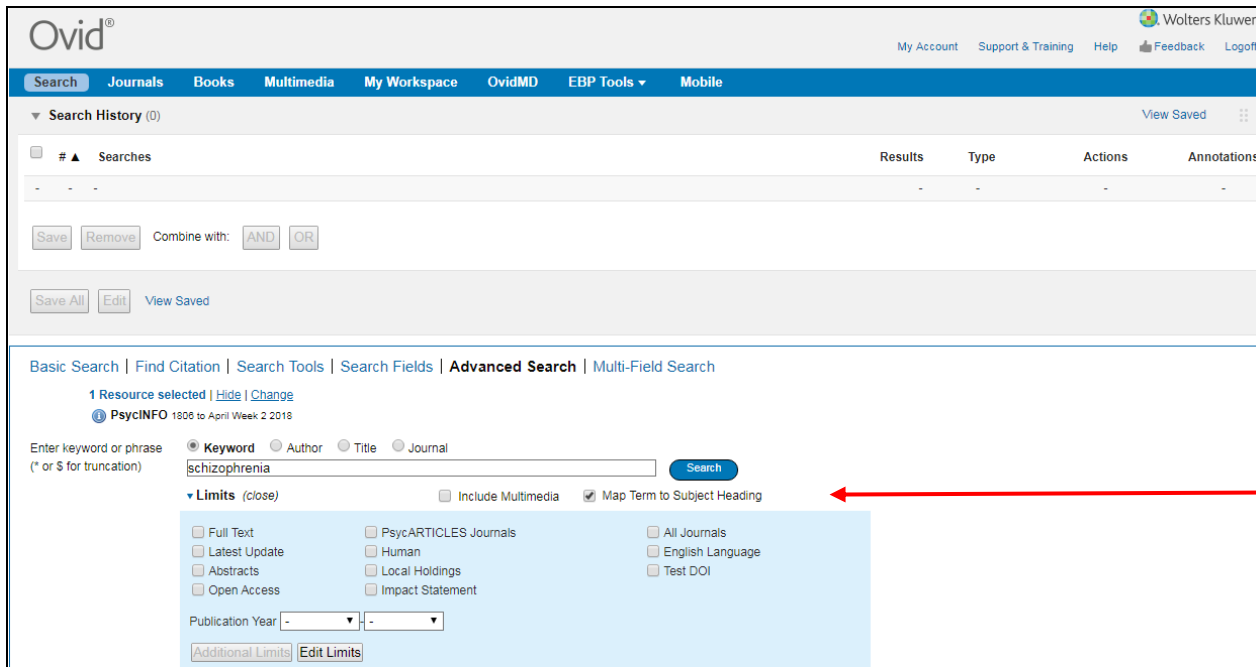

#### 3. Access PsycINFO via Ovid

Open the Library’s Website at <http://www.alfredlibrary.org>  
Go to the Resources page and click on the **PsycINFO (Ovid)** link.

**NB: For University staff and students, access to PsycINFO may also be available via your University Library’s website.**

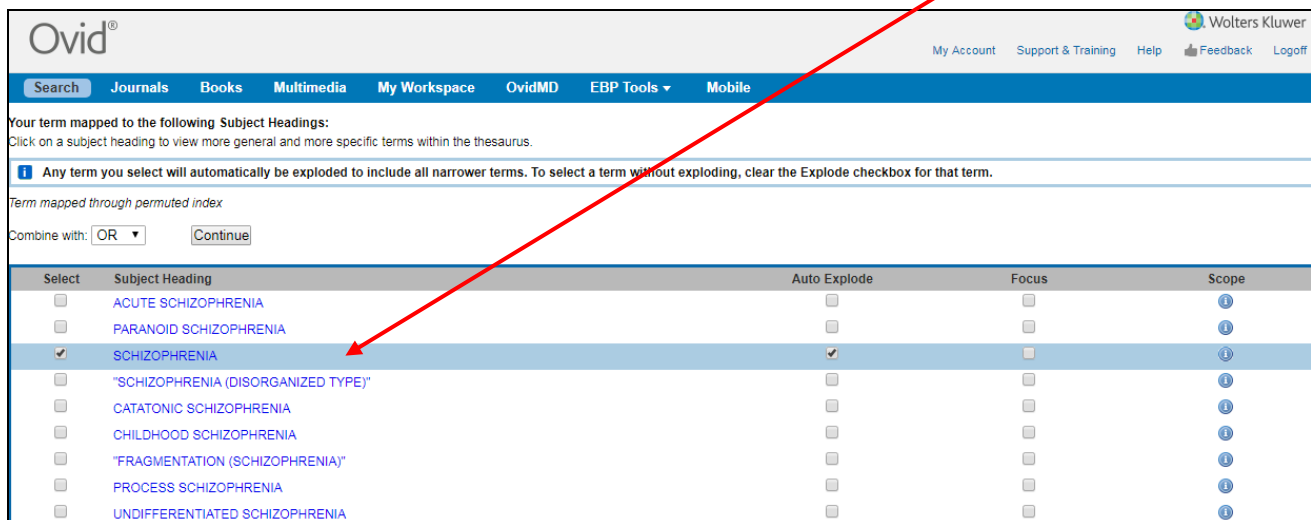

**4. Type your first search term (Schizophrenia) into the search box, then click on the search button.**

Notice that the “Map Term To Subject Heading” box is ticked, so you are doing a SUBJECT HEADING search. This will map the term **schizophrenia** to the subject headings within the database.

**5. Select a subject heading from those suggested.**

Notice that Schizophrenia is in blue writing, which denotes it as a subject heading from the thesaurus. Please note: If there is no exact match, a list of possible subjects will appear. If this occurs, select the most appropriate one.

- ❖ The **Explode** option means that you will search on this subject, plus any more specific subject terms from the thesaurus.
- ❖ The **Focus** option allows you to retrieve only those articles where this subject heading is the major focus of the article. If you wish, you can select both Explode and Focus.

**6. Click on the Continue button**

## 7. Now you have a set of results for Schizophrenia.

The screenshot shows a search interface with a blue header containing navigation tabs: Search, Journals, Books, Multimedia, My Workspace, OvidMD, EBP Tools, and Mobile. Below the header is a 'Search History (1)' section with a table:

#	Searches	Results	Type	Actions	Annotations
1	exp SCHIZOPHRENIA/	84488	Advanced	Display Results More	

Below the table are buttons for 'Save', 'Remove', and 'Combine with: AND OR'. Further down are 'Save All', 'Edit', 'Create RSS', and 'View Saved' buttons. The main search area includes a search box with a 'Search' button and radio buttons for 'Keyword', 'Author', 'Title', and 'Journal'. A 'Limits' section is expanded, showing various filters like 'Full Text', 'Latest Update', 'Abstracts', 'Open Access', 'PsycARTICLES Journals', 'Human', 'Local Holdings', 'Impact Statement', 'All Journals', 'English Language', and 'Test DOI'. There are also 'Publication Year' dropdowns and 'Additional Limits' and 'Edit Limits' buttons.

## 8. You can now enter your next search term (Marijuana) into the search box and repeat steps 5 and 6. You will then have results for Marijuana added to the Search History.

The screenshot shows the same search interface as above, but with two entries in the 'Search History (2)' table:

#	Searches	Results	Type	Actions	Annotations
1	exp SCHIZOPHRENIA/	84488	Advanced	Display Results More	
2	exp MARIJUANA/	2772	Advanced	Display Results More	

The rest of the interface, including the search box and filters, remains the same as in the previous screenshot.

**9. You can now enter your next search term (Marijuana Usage) into the search box and repeat steps 5 and 6. You will then have results for Marijuana Usage added to the Search History.**

The screenshot shows a search interface with a blue header containing navigation tabs: Search, Journals, Books, Multimedia, My Workspace, OvidMD, EBP Tools, and Mobile. Below the header is a 'Search History (3)' section with a table of search results:

#	Searches	Results	Type	Actions	Annotations
1	exp SCHIZOPHRENIA/	84488	Advanced	Display Results More	
2	exp MARIJUANA/	2772	Advanced	Display Results More	
3	exp Marijuana Usage/	2547	Advanced	Display Results More	

Below the table are buttons for 'Save', 'Remove', and 'Combine with: AND OR'. At the bottom, there are buttons for 'Save All', 'Edit', 'Create RSS', and 'View Saved'. The main search area below includes a search box with the text '1 Resource selected | Hide | Change' and '1 PsycINFO 1806 to April Week 2 2018'. The search box contains the text 'Enter keyword or phrase (\* or \$ for truncation)'. There are radio buttons for 'Keyword', 'Author', 'Title', and 'Journal'. A 'Search' button is to the right. Below the search box are 'Limits (close)' options, including 'Include Multimedia' and 'Map Term to Subject Heading'. A list of filters is shown, including 'Full Text', 'Latest Update', 'Abstracts', 'Open Access', 'PsycARTICLES Journals', 'Human', 'Local Holdings', 'Impact Statement', 'All Journals', 'English Language', and 'Test DOI'. There are also 'Publication Year' dropdown menus and 'Additional Limits' and 'Edit Limits' buttons.

**10. You can now enter your next search term (Cannabis) into the search box and repeat steps 5 and 6. You will then have results for Cannabis added to the Search History.**

The screenshot shows the same search interface as above, but with a fourth entry added to the search history:

#	Searches	Results	Type	Actions	Annotations
1	exp SCHIZOPHRENIA/	84488	Advanced	Display Results More	
2	exp MARIJUANA/	2772	Advanced	Display Results More	
3	exp Marijuana Usage/	2547	Advanced	Display Results More	
4	exp CANNABIS/	7130	Advanced	Display Results More	

The rest of the interface, including the search box and filters, remains the same as in the previous screenshot.

You now have four search sets:

- ❖ Set one for the first concept of Schizophrenia,
- ❖ Sets two, three and four, for the second concept of Marijuana.

These search sets now need to be combined to obtain your final result.

## 11. To combine your search sets, please refer to the Search History.

#	Searches	Results	Type	Actions	Annotations
1	exp SCHIZOPHRENIA/	84488	Advanced	Display Results More ▾	Annotations
<input checked="" type="checkbox"/>	2 exp MARIJUANA/	2772	Advanced	Display Results More ▾	Annotations
<input checked="" type="checkbox"/>	3 exp Marijuana Usage/	2547	Advanced	Display Results More ▾	Annotations
<input checked="" type="checkbox"/>	4 exp CANNABIS/	7130	Advanced	Display Results More ▾	Annotations

Save Remove Combine with: AND OR

We will first work on the **marijuana** concept as there are three terms for this. Select the three sets by clicking the boxes in the first column on the left hand side. A tick will appear once selected.

Combine with: AND OR

At the bottom of the Search History, you will see:

### The OR operator is used when combining alternatives.

So make sure you click on the  OR button.

This gives you a set of records that contain Marijuana or Marijuana Usage or Cannabis.

#	Searches	Results	Type	Actions	Annotations
2	exp MARIJUANA/	2772	Advanced	Display Results More ▾	Annotations
3	exp Marijuana Usage/	2547	Advanced	Display Results More ▾	Annotations
4	exp CANNABIS/	7130	Advanced	Display Results More ▾	Annotations
<input checked="" type="checkbox"/>	5 2 or 3 or 4	9134	Advanced	Display Results More ▾	Annotations

Save Remove Combine with: AND OR

Expand

Note: The search history defaults to display only 4 sets. To see all the sets in the search history, click on the link to Expand.

## 12. We can now combine the two concepts together.

Select the relevant sets by ticking the boxes in the left hand column

#	Searches	Results	Type	Actions	Annotations
<input checked="" type="checkbox"/>	1 exp SCHIZOPHRENIA/	84488	Advanced	Display Results More ▾	Annotations
<input type="checkbox"/>	2 exp MARIJUANA/	2772	Advanced	Display Results More ▾	Annotations
<input type="checkbox"/>	3 exp Marijuana Usage/	2547	Advanced	Display Results More ▾	Annotations
<input type="checkbox"/>	4 exp CANNABIS/	7130	Advanced	Display Results More ▾	Annotations
<input checked="" type="checkbox"/>	5 2 or 3 or 4	9134	Advanced	Display Results More ▾	Annotations

Save Remove Combine with: AND OR

Contract

Combine with: AND OR

At the bottom of the Search History, you will see:

### The AND operator is used when putting concepts together.

Click on the  AND button.

#	Searches	Results	Type	Actions	Annotations
1	exp SCHIZOPHRENIA/	84488	Advanced	Display Results   More	Contract
2	exp MARIJUANA/	2772	Advanced	Display Results   More	
3	exp Marijuana Usage/	2547	Advanced	Display Results   More	
4	exp CANNABIS/	7130	Advanced	Display Results   More	
5	2 or 3 or 4	9134	Advanced	Display Results   More	
6	1 and 5	479	Advanced	Display Results   More	

This gives you a set of records that will contain both concepts.

That is, set number 6 now has results which will include Schizophrenia and (Marijuana or Marijuana Usage or Cannabis).

### 13. You can limit the last set in the search history by using the Limits below the search box.

For example, in the following screen we have ticked English Language (1) and selected the years 2010 to current in the publication year boxes (2). After making your selections click on the search button (3) and the limits will be applied to the last set in the search history. In the example below, the limits will be applied to set 6.

Basic Search | Find Citation | Search Tools | Search Fields | **Advanced Search** | Multi-Field Search

1 Resource selected | Hide | Change  
 PsycINFO 1806 to April Week 2 2018

Enter keyword or phrase (\* or \$ for truncation)

Keyword
  Author
  Title
  Journal

Include Multimedia
  Map Term to Subject Heading

Full Text
  PsycARTICLES Journals
  All Journals

Latest Update
  Human
  English Language

Abstracts
  Local Holdings
  Test DOI

Open Access
  Impact Statement

Publication Year: 2010 | Current

#### 14. Click on the **Display Results** link next to the results you wish to view.

The first lot of results is **displayed**. The results are in citation format, and any links to full-text, complete reference or abstract are displayed on the right hand side of the screen.

The screenshot shows a search results interface. On the left, there is a sidebar with 'Search Information' and 'Filter By' sections. The main area displays two search results. The first result is selected with a checkmark. To the right of each result are several action links: 'Abstract Reference', 'Complete Reference', 'Find Similar', and 'Find Citing Articles'. A red arrow points to the 'Complete Reference' link for the second result.

**Note:** the Complete Reference is not the full-text - it is a link to all the fields contained in the record for that reference. These fields include the citation, as well as a list of all the **subject headings** that have been applied to that citation. This can be a useful feature when searching for alternative terms for a concept.

**Hint:** To display the abstracts on your results page, click on this button (just above your first citation)

A close-up of the search results toolbar. It includes buttons for 'All', 'Range', 'Clear', a button with three horizontal lines (used for toggling abstracts), a '10 Per Page' dropdown, a '1' page indicator, and a 'Go' button. A red arrow points to the three-line button.

#### 15. To select a citation for printing, saving etc., tick the box next to it.

At the bottom of the page, use the **Next >** and **< Previous** links to go forwards and backwards through the results list.

#### 16. When you've finished selecting your citations, click on the **Keep Selected** link.

This allows you to make a new set in the search history of the results that you selected.

The screenshot shows a search history table with the following columns: '#', 'Searches', 'Results', 'Type', 'Actions', and 'Annotations'. The table contains 8 entries. The last entry, 'from 7 keep 1-2, 5, 10', is highlighted in blue. A red arrow points to the 'Keep Selected' link in the 'Actions' column for this entry.

## 17. Output Choices

Output choices, **Print**, **Email**, **Export**, or **+ My Projects (Add to My Projects)** are at the top and bottom of each results page. Choose from the following:

### Print:

- **Select Fields to Display:** Choose from preset options or create a custom list
- **Select Citation Style:** Choose from **Ovid Labeled Citation** or choose another style (APA, MLA, Chicago, etc.)
- **Include:** Tick **Search History** to include the search history.

### Email:

**To:** type in address.

Add **Subject** title and Message (if required)

**Consider also:** Select Fields to Display, Select Citation Style, and Include Search History as mentioned above

### Export:

- Use **Microsoft® Word** format for word processing
- Use **Citavi/EndNote®/ProCite®/Reference Manager®** for local reference management
- Use **Reprint/Medlars** for importing .txt files into EndNote

### My Projects:

**My Projects** is a research organization area containing projects and folders where you may store searches, text, results, citations, full text, graphics and many other items. **My Projects** also offers the output options (**Print**, **Email** or **Export**) and the option to **Remove** (delete) saved items if required.

To use My Projects, you will need to set up an account (see next section on Personal Account).

Select items using the checkboxes and choose the **+ My Projects** link at the top and bottom of each page and follow any prompts. You will need to create a project or select an existing project or folder.

Or click the **My Projects** link next to each individual result or item.

## 18. Personal Account

A Personal Account provides access to **My Workspace** that contains **My Projects**, **My Searches & Alerts** and **My eTocs**. Your account also stores your annotations and any interface settings. If you wish to add to, or access any of these areas, you must login with your Personal Account ID and password.

Ovid displays a My Account link on the session

You will need to login to your personal account to access selected functions. Functions which require a personal account are:

- Saved Searches and Alerts
- My Projects
- Annotate items
- Retention of customized displays and settings

Click on the [My Account](#) link to login.

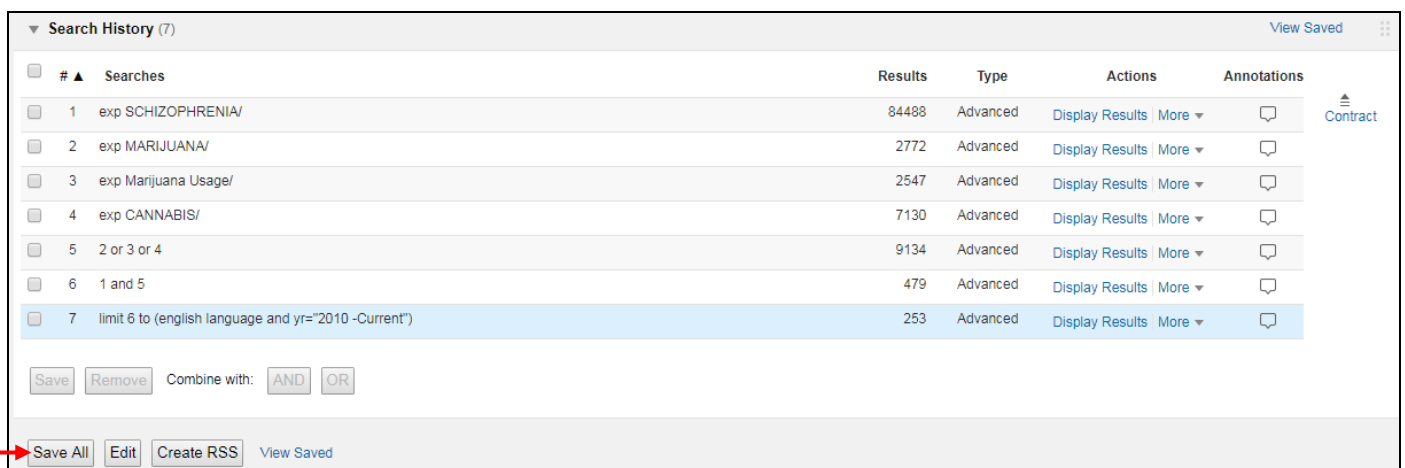

If you haven't created an account yet, you can create one using the "Create Account" link.

## 19. Saved Searches and Alerts

As you develop search strategies, you may want to save them for later use. Ovid lets you store search sets created during any search session, log off and return at a later time without having to retype each search set manually.

Save your searches by clicking the [Save All](#) button at the bottom of the *Search History* window.

After logging in, fill in the boxes to save your search:

1. Type a search name in the text box. (search name must not exceed 80 characters)
2. Type comments in the text box. (This is OPTIONAL)
3. The default search type is Permanent.
4. Click the Save button.

The different types of saved searches are:

- ◆ **Permanent** - Saves the search for as long as your site maintains a valid subscription. Use this option to save and rerun at another time.
- ◆ **Temporary** - Saves the search for a period of twenty-four hours, then deletes it
- ◆ **AutoAlert** - Creates a search that runs automatically on a regular basis and emails results to designated recipients.

Ovid displays a confirmation message at the top of the Search page once you have saved your search. For example:

## 20. Accessing Saved Searches

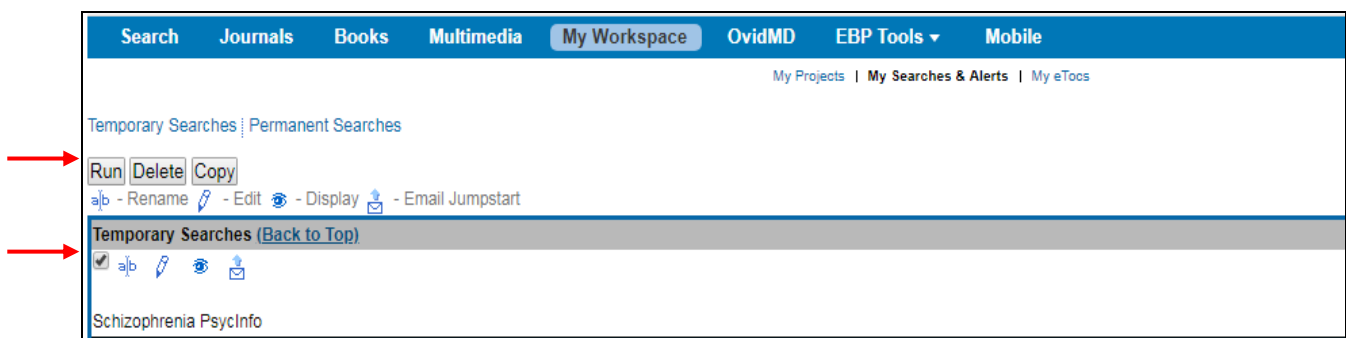

You may view and access your Saved Searches and alerts by clicking on [View Saved](#).

Alternatively you can click on [My Workspace](#). You may need to log in again if you have previously logged off.

When you select either of these options, the system will display all your saved searches organized by search type.

To access your saved search, tick the box next to it and then click on the [Run](#) button.

## 21. Keyword (Textword) Searching

If your subject heading search does not map to a suitable term, try searching with keywords (also known as textwords). Textword searching lets you search for the exact word or phrase in a chosen field such as title or abstract. It is useful in finding information about a concept that:

- has no appropriate subject heading
- might be very new to the literature
- has a very specific name, such as the GUSTO Trials

**Note:** Textword searching also allows you to find the most recently added citations which haven't been indexed yet with subject headings.

### ❖ Textword field searching

The textword command **.mp.** tells Ovid that you are looking for a textword and therefore bypasses the subject mapping system. The **.mp.** command will look for the word in the title, abstract, and as a subject heading word.

### ❖ Truncation & Wildcards

Textwords can be truncated to pick up various forms of a word. Truncation is useful if the textword or phrase can be expressed in a variety of ways. Use the asterisk \* to indicate where the word should be truncated, followed by the **.mp.** command, to indicate that you want to search a textword, not a subject heading.

Wildcards can be used to find word/spelling variations.

- Use \* at the end of a word or part of a word to retrieve unlimited suffix variations  
eg. disease\* for diseases or diseased.
- Use # inside or at the end of a word to replace exactly one character eg. wom#n.
- Use ? inside or at the end of a word to replace zero or one character eg. robot? or flavo?r.

### Truncation example:

The following screen shows a textword search for **hypno\*.mp.**

This will retrieve words such as hypnosis, hypnotic, hypnotism, hypnotise etc.

The screenshot shows a search interface with the following elements:

- Navigation links: Basic Search | Find Citation | Search Tools | Search Fields | **Advanced Search** | Multi-Field Search
- Status: 1 Resource selected | Hide | Change
- Database: PsycINFO 1806 to April Week 2 2018
- Search criteria: Enter keyword or phrase (\* or \$ for truncation). Selected field: **Keyword** (radio button selected). Search term: hypno\*.mp.
- Buttons: Search (blue button)
- Options: Limits (close) (dropdown), Include Multimedia (checkbox), Map Term to Subject Heading (checkbox, checked)

### ❖ Title Field

If the textword field option is too broad, that is, too many results are retrieved; you can choose to search for a word in the title field. To perform a Title field search, select the radio button next to Title. Remember to use truncation for word variations.

### For example:

The following screen shows a title field search for the truncated word **exercis\***. This will retrieve words such as exercise, exercised, exercises, exercising etc. in the title.

The screenshot shows a search interface with the following elements:

- Navigation links: Basic Search | Find Citation | Search Tools | Search Fields | **Advanced Search** | Multi-Field Search
- Status: 1 Resource selected | Hide | Change
- Database: PsycINFO 1806 to April Week 2 2018
- Search criteria: Enter title word or phrase to search. Selected field: **Title** (radio button selected and circled in red). Search term: exercis\*
- Buttons: Search (blue button)
- Options: Limits (close) (dropdown), Include Multimedia (checkbox), Map Term to Subject Heading (checkbox, checked)

## ❖ Multi-Field Search

To access the **Multi-Field Search** area, click on the tab located next to Advanced Search.

You can use **Multi-Field Search** to search multiple terms in specific fields, and combine your terms using your choice of **AND** or **OR** Boolean operators.

Basic Search | Find Citation | Search Tools | Search Fields | Advanced Search | **Multi-Field Search**

1 Resource selected | [Hide](#) | [Change](#)

PsycINFO 1806 to April Week 2 2018

AND	autism or autistic	Title
AND	hypno* or exercis*	Abstract
AND		All Fields

[+ Add New Row](#) [Search](#)

Enter a word or phrase in the search box. Select a field to search from the adjacent pull down menu. Search a single term in a specific field, or enter a second or third term to be searched in specific fields in the search boxes provided. Remember to use truncation or wildcard symbols where appropriate.

***Please ask a Librarian for any assistance with database searching.***

## 22. Accessing the full text of your citations.

For those citations that do not have a full text link available, you will have to check the library's holdings. There is a listing for the online journals on the library webpage: <http://www.alfredlibrary.org>

For articles that are not held by The Ian Potter Library, a document delivery service may be available. Please check with the library to see what document delivery services are available to you.

For further information please contact the library on 90763042 or [library@alfred.org.au](mailto:library@alfred.org.au)
